If this does not work, we have a third option: Close the server. Delete the folder "Server-resource-packs" from the.minecraft folder. (If you don't know how to do this, you can search the internet or ask in this forum). Open the server and try to log . The files that caused this problem were all from the the pack called "newerth" (which did not solve the problem). After I deleted those files, everything is working fine now. If you still have the old files, delete them. Q: Using Codeigniter: PHP Warning: date() expects parameter 1 to be string I'm very new to php and coding in general, I am using codeigniter. I'm trying to make a small web page with a form where users can enter a coupon code and get discount. The page works properly, until I enter a

coupon that doesn't exist in the database. Then it gives this error: PHP Warning: date(): It is not safe to rely on the system's timezone settings. You are required to use the date.timezone setting or the date_default_timezone_set() function. In case you used any of those methods and you are still getting this warning, you most likely misspelled the timezone identifier. We selected the timezone 'UTC' for now, but please set date.timezone to select your timezone. in /var/www/html/auction.co.uk/index.php on line 84 This is my code: db->select('*'); \$this->db->from('coupons'); \$this->db->where('coupon_code', \$code); \$this->db->where('is_valid',1); \$this->db->where('is_active', 1); \$this->db->where('timestamp >=', \$now); \$this->db->where('timestamp db->limit(1); \$query 82157476af
